---

Dear Committee:

I strongly oppose the amendment to SCR 218. Filing a lawsuit should not subject litigants to the disclosure of ALL of their medical records especially as it pertains to mental health, substance abuse, and other private information that is contained in their records. A common sense approach is the disclosure of medical records that are related to the injuries sustained and making sure any order complies with the protections provided by State and Federal Law including the protections afforded by HIPAA. An individual's constitutional right to privacy should mean more than the private business interests of the insurance industry.

Thank you for your time and consideration.

Regards,  
Marc
