Good Afternoon,

I am opposed to the proposed amendment to Illinois Supreme Court Rule 218. The language is far too broad and does not take into account the disclosure of only relevant information. Being the victim of a tort should not require one to be victimized again by allowing almost unfettered access to their private medical history without regard to relevancy. Additionally, this information is then recorded and logged for future use.

I appreciate your consideration of my thoughts on this subject.

Thank you,

Gary P. Stone
