

eFileIL & re:SearchIL - Security Integration

The purpose of this table is to ensure all CMS Partners have implemented uniform exchange values for eFileIL & re:SearchIL so that these services are consistent with the Court's RAP / SC Rule 8. The Values returned by each CMS should be consistent with the Security Values listed.

Supreme Court Rule 8 indicates values of 'public,' 'impounded,' 'confidential,' 'sealed,' and 'expunged.' Impounded, Confidential, Sealed and Expunged cases and documents are currently not authorized for remote access pursuant to the Remote Access Policy and Supreme Court Order.

*Cases and documents, which are secured by Unique Code Identifier (UCI), are applied by the Electronic Filing Manager (EFM) as identified in the Public Facing Configuration Codes. Case and document ECF Security Value is required to be transmitted with every transaction, regardless of security designated by UCI.

eFileIL

1. CMS response to query for GetCaseResponse API Transaction.

<u>Security (SCR 8)</u>	<u>ECF Security Value</u>	<u>eFileIL Security Setting Sent to CMS</u>	<u>GetCaseResponse API*</u>	<u>Description</u>
Public	PublicFilingPublicView	Non-Confidential	CMS: All fields are returned; no masking.	Accessible by any person upon request, which means searching for the case, as defined in SCR 8 or as authorized by court order.
Impounded	PublicFilingPrivateView	Confidential	CMS: All fields are masked, except case number, case category and case type. EFM: Independently secures all fields, in addition to case category and case type.	Only the case number should show to the filer. Any person (regardless if they are a party of record or a participant) can file into the case. The filer must know the case number to search for the case. No other information should be shown to the filer when the case is returned. SCR 8 defines accessibility - where electronic filing is delivery of documents to a case. The limitations of accessibility are applied to the remainder of the case information.
Confidential	PublicFilingPrivateView	Confidential	CMS: All fields are masked, except case number, case category and case type.	Only the case number should show to the filer. Any person (regardless if they are a party of record or a participant) can file into the case. The filer must know the case number to search for the case. No other

eFileIL & re:SearchIL - Security Integration

			EFM: Independently secures all fields, in addition to case category and case type.	information should be shown to the filer when the case is returned. SCR 8 defines accessibility – where electronic filing is delivery of documents to a case. The limitations of accessibility are applied to the remainder of the case information.
Sealed	Sealed	Confidential	CMS: All fields are masked, except case number, case category and case type. EFM: Independently secures all fields, in addition to case category and case type.	Only the case number should show to the filer. Any person (regardless if they are a party of record or a participant) can file into the case. The filer must know the case number to search for the case. No other information should be shown to the filer when the case is returned. SCR 8 defines accessibility - where electronic filing is delivery of documents to a case. The limitations of accessibility are applied to the remainder of the case information.
Expunged	PrivateFilingPrivateView	N/A	CMS: Error Value “30” is returned – No Case Found	Not accessible as defined in SCR 8.

re:SearchIL

1. CMS response to query for **GetCaseResponse** API Transaction.

<u>Security (SCR 8)</u>	<u>ECF Security Value</u>	<u>GetCaseResponse API*</u>	<u>Description</u>
Public	PublicFilingPublicView	CMS: All fields are returned; no masking. R/S: All information displayed to all User Groups.	Accessible by any person upon request as defined in SCR 8 or as authorized by court order.
Impounded	PublicFilingPrivateView	CMS: All fields are masked, except case number, case category and case type. R/S: All User Groups – No Case Found	The Remote Access Policy currently prohibits access to impounded cases.

eFileIL & re:SearchIL - Security Integration

Confidential	PublicFilingPrivateView	CMS: All fields are masked, except case number, case category and case type. R/S: All User Groups – No Case Found	The Remote Access Policy currently prohibits access to confidential cases.
Sealed	Sealed	CMS: All fields are masked, except case number, case category and case type. R/S: All User Groups – No Case Found	The Remote Access Policy currently prohibits access to sealed cases.
Expunged	PrivateFilingPrivateView	CMS: Error Value “30” is returned – No Case Found	Not accessible as defined in SCR 8.

Note: Currently, no impounded, confidential, or sealed information is available in re:SearchIL as required by the Remote Access Policy and Supreme Court Order; in order to eventually expand access to secured cases and documents, re:SearchIL will need to distinguish between impounded and confidential settings. Future amendments to the Remote Access Policy may expand access.

2. CMS response to query for **GetDocumentResponse** API Transaction.

<u>Security (SCR 8)</u>	<u>ECF Security Value</u>	<u>GetDocumentResponse API*</u>	<u>Description</u>
Public	PublicFilingPublicView	CMS: Document is returned; no masking.	Accessible by any person upon request as defined in SCR 8 or as authorized by court order.
Impounded	PublicFilingPrivateView	CMS: Document is returned, title is masked as “impounded document filed”. R/S: All User Groups – CMS Masked Title is available, document link is not available.	The Remote Access Policy currently prohibits access to impounded documents.
Confidential	PublicFilingPrivateView	CMS: Document is returned, title is masked as “confidential document filed”. R/S: All User Groups – CMS Masked Title is available, document link is not available.	The Remote Access Policy currently prohibits access to confidential documents.

eFileIL & re:SearchIL - Security Integration

Sealed	Sealed	CMS: Document is returned, title is masked as "sealed document filed". R/S: All User Groups – CMS Masked Title is available, document link is not available.	The Remote Access Policy currently prohibits access to sealed documents.
Expunged	PrivateFilingPrivateView	CMS: Document not returned – no document or data is available.	Not accessible as defined in SCR 8.

Note: Currently, no impounded, confidential, or sealed information is available in re:SearchIL as required by the Remote Access Policy and Supreme Court Order; in order to eventually expand access to secured cases and documents, re:SearchIL will need to distinguish between impounded and confidential settings. Future amendments to the Remote Access Policy may expand access.
